WORK EXPERIENCE

01/2024 - 12/2025

Junior Fullstack Developer | TOILA AI EDUCATION JOINT STOCK COMPANY

Responsibilities:

- Contributed directly to the development of enterprise products including **WholsMe Platform** and **ToilaAI CMS**.
- Designed database structures using **MongoDB** and **PostgreSQL** for core modules: *User, Journal, Archetype, CMS Content*.
- Built **RESTful CRUD APIs**, **authentication** flows, and **role-permission** access layers for multi-level authorization.
- Converted UI designs from **Figma** → **production-ready front-end**, ensuring pixel accuracy, responsiveness, and reusable component patterns.
- Developed **CMS modules: User Management, Content Hub, Event System, Data Tracking Dashboard**.
- Collaborated in a 10-member team including Backend, Frontend, UX/UI, and Product Owner to deliver features in Agile sprint cycles.

Achievements & Impact:

- Reduced **UI** development time through modularized **component** architecture.
- Delivered high-performance, scalable APIs with improved response time post-optimization.
- Contributed to continuous on-time sprint releases for **6+ months**.

10/2022 - 12/2025

Programming instructor | MindX Technology School Joint Stock Company

Responsibilities:

- Taught **HTML/CSS/JavaScript** and guided learners through building project-based applications.
- Developed students' problem-solving mindset, debugging ability, and logical thinking in coding.
- Mentored multiple student teams from ideation → UI implementation → deployment.

Impact:

- Successfully trained **100+ students**, enabling them to independently build **mini-projects**.

IELTS 6.5

10/2020

International English Language Testing
System

- Improved **critical thinking** and **technical mindset** for new learners entering the programming path.

01/2024 - 07/2024

Frontend Developer Fresher | VBI Academy

Responsibilities:

- Participated in developing internal products used for blockchain operations and research, including a management website and a **DApp** that interacts directly with smart contracts.
- Converted **Figma** → **React/Next.js UI** with pixel-perfect accuracy and stable performance.
- Implemented core Web3 features: **MetaMask wallet connection**, **contract read functions**, **on-chain data retrieval** using Web3.js.
- Designed user-friendly UI flows tailored for new Web3 users, improving accessibility and onboarding experience.
- Refactored component structure using the **container/presentational pattern** to enhance scalability and maintainability.
- Contributed to internal code reviews, proposing improvements in **UI logic** and data-handling modularization.

Outcome & Impact:

- Optimized **UI/UX** and improved interface responsiveness, especially on **mobile devices**.
- Reduced redundant code through refactoring, resulting in a cleaner and more **maintainable** codebase.
- Product successfully deployed for **long-term** internal usage.

FEATURED PROJECTS

08/2025 - 12/2025

Ecommerce Bunny – Fullstack MERN (Personal project)

Description:

A complete e-commerce web application supporting product browsing, account authentication, cart management, and full checkout flow.

Key Features:

- Product **CRUD**, **JWT** Authentication, User/Guest Cart System, Checkout
- Cart merge logic (Guest ↔ Authenticated User), Product filtering + sorting
- Responsive UI with optimized mobile-first UX

Tech Stack: MERN, TypeScript, TailwindCSS, React Router, Redux Toolkit, JWT

01/2025 - 12/2025

ToilaAI Knowledge Base – CMS Internal System (Team size: 10)

Description:

A document management platform designed for internal training, knowledge sharing, and enterprise information organization.

Role & Contributions:

- Designed database schema using **MongoDB + PostgreSQL** for core modules: *User, Journal, Archetype, CMS Content*.
- Developed **RESTful CRUD APIs**, authentication flow, and multi-level role-

permission access control.

- Converted **Figma** → **pixel-perfect front-end** with responsive layout and reusable UI component architecture.
- Built CMS modules including **User Management, Content Hub, Event System, Data Tracking Dashboard**.
- Collaborated in a 10-person (Backend, Frontend, BA, UI/UX, Product Owner) to deliver sprint-based features.

Tech Stack: React, Node.js, Express.js, MongoDB, PostgreSQL, TailwindCSS

01/2025 - 12/2025

WholsMe Platform (Team size: 10)

Description:

A user behavior profiling system based on Archetype Models, designed for personality analysis and experience optimization.

Responsibilities:

- Designed database architecture using **MongoDB + PostgreSQL** for User, Journal, and Archetype Mapping.
- Developed **Authentication, CRUD APIs, and role-based authorization** system.
- Implemented UI from Figma designs, including **admin dashboard, user profile, and experience flow**.

Tech Stack: Next.js, TailwindCSS, Node.js, Express.js, MongoDB, PostgreSQL, JWT
